

Information Security Policy

[Basic Principle]

Hitachi Capital protects its information assets in an appropriate manner with the information security management system.

[Action Guidelines]

1. We will implement information security activities which fulfill the organizational, personnel, physical, and technical security management measures.
2. We will maintain the confidentiality, integrity and availability of the information assets handled in our business activities.
3. We will comply with laws, ordinances, regulations and other norms concerning information security. In addition, we will develop internal rules are in line with these laws, ordinances, regulations, and other norms. In case of violation of such internal rules, our staff will be subject to disciplinary actions in accordance with company policies and procedures.
4. We will raise executives and staff awareness of information security and provide relevant training and seminars.
5. We will make every effort to prevent information security incidents, but once an incident occurs, we will disclose the fact in a timely and appropriate manner and take immediate actions to prevent a recurrence.
6. We will continually improve the information security management system.
